

## LG EDEN COLLECTION

We are excited to introduce to you the first surfacing product of its kind, the LG EDEN COLLECTION. This innovative new product line from LG is made from 12% recycled content, making it the only acrylic countertop that is easy on the environment. LG Chem is committed to preserving the environment, and has made a significant investment over the past five years in an ongoing attempt to manufacture a variety of sustainable products. The LG EDEN COLLECTION is a reflection of these efforts and maintains the same superior style and performance of the other LG surfacing products.

## U.S. Green Building Council

The U.S. Green Building Council (USGBC) is the nation's foremost nonprofit coalition of over 6,000 companies and organizations from across the building industry promoting high-performance green buildings that are environmentally responsible, profitable, and healthy places to live and work. The USGBC developed LEED as a voluntary, consensus-based national standard to support and validate successful green building design, construction, and operations. LG EDEN COLLECTION is a current member.

“As a global company, it is not only our responsibility, but also our objective to produce high quality products without harming the environment.”

- Jin Hyung Hwang,  
President of LG CIM

## Environmental Design, Elegant Nature

{ Ivy | G502R

The LG EDEN COLLECTION was inspired by the pleasing aroma and organic beauty of different botanicals. From warm olive tones to rich creamy beige, all of the colors were meticulously designed to evoke the senses and represent the magnificence of the earth's natural palette.
